

AlgoVerse 2026

PPT Submission Guidelines | Algorand Hackathon — Agentic Payments (x402)

All teams must submit a project PPT along with their live demo during the Project Submission & Documentation window (12:30 PM – 01:00 PM, 12th August 2026). The deck should be clear, concise, and follow the standard structure below.

Recommended Slide Structure (8–10 slides)

- 1. Title Slide** — Project name, team name, members, college(s), problem statement chosen (PS0401–PS0407).
- 2. Problem Statement & Motivation** — The real-world problem being solved and why it matters.
- 3. Proposed Solution / Idea** — High-level overview of what the project does.
- 4. Identified Paying User & Business Model** — Who pays, for what, and why it's pay-per-use (not subscription).
- 5. x402 Payment Flow (Technical Core)** — Diagram showing Challenge (402) → Sign → Retry → Settle, with facilitator and settlement layer used.
- 6. Architecture & Tech Stack** — Client/server/facilitator/settlement components used (e.g., @x402/fetch, @x402/hono, USDC ASA).
- 7. Demo Screenshots / Transaction Proof** — Screenshot of a successful response with the Algorand transaction ID.
- 8. Innovation & Differentiation** — What makes the solution novel vs. existing/traditional approaches.
- 9. Completeness & Functionality** — What's working end-to-end vs. what's planned next.
- 10. Real-World Impact & Scalability** — Who benefits, mainnet-readiness, and future scope.

Judging Alignment

Make sure your slides clearly speak to each of the criteria the judges will score against:

Judging Criteria	What to Show in the PPT
Technical Implementation	Architecture slide, x402 flow diagram, transaction ID proof
Innovation	Differentiation slide — why this approach is novel
Real-World Impact	Paying-user slide, scalability / mainnet-readiness
Completeness & Functionality	Clear “done vs. pending” breakdown, working demo screenshots
Presentation Quality	Clean, minimal slides — diagrams over dense text/paragraphs
x402 Theme Alignment	Dedicated payment-flow slide showing all 4 steps clearly

Format Rules

- Maximum 10 slides (excluding title slide).
- Submit in PDF or PPTX format only.
- Must include at least one screenshot/proof of a working testnet/mainnet transaction.
- Presenter(s) get 5 minutes to walk through the PPT + live demo, followed by 3 minutes of Q&A.
